

"Inspiricon, with its data science know-how, has significantly contributed to the development of our future data analysis strategy. Using concrete examples, the Inspiricon experts were able to show us the use of Advanced Statistic and Machine Learnign methods in the analysis of manufacturing and quality data in terabyte reports.

With Inspiricon, we have a very innovative and competent partner on site in Freiburg who is helping us shape our analytical strategy".

Stefan Rössel Director IT, TDK-  
Micronas GmbH
